

Integrated Energy Solutions for a Healthy & Sustainable World

Greenleaf Advisors helps customers meet their energy needs by teaming with service partners to deliver clean, reliable, and affordable solutions.

Greenleaf is a consulting and transaction-services firm that helps enterprises and communities develop sustainably by bridging them to resources and strategies they need to operate in a healthy way. By leveraging the best-in-class offerings of its partners, Greenleaf enables customers meet their financial and operating objectives and minimize their carbon footprint. In addition to the offerings outlined below, Greenleaf works with development and financial experts to support the execution of projects in urban and rural environments.

IG **Intelligent Generation** (intelgen.com) works with large energy consumers and local developers to deliver projects that integrate energy storage with solar power and/or natural gas-fired gensets. IG's software platform earns revenue through wholesale markets, saves on utility expenses, and protects critical systems.

G&W **G&W Electric** (G&W) (gwelec.com) uses the latest technologies in load and fault interrupting switchgear, reclosers, system protection equipment and distribution automation. They bring their expertise to the renewable energy market and are developing and advancing integrated, smart microgrid solutions.

JACOBS (jacobs.com) serves power and utility companies, private companies and public institutions with cost-effective, efficient, high-quality solutions while supporting them in a vast range of energy projects from power generation, energy integration, and heat recovery through transmission and distribution.

 **Continental Electrical Construction Company** (cecco.com) is Chicago's #1 electrical construction company and a leader in renewable energy and storage projects. They have built renewable energy solutions for retail, warehouse and campus solutions with solar PV, solar + battery storage solutions, and electric vehicle chargers.

 **Medill Renewable Energy** is a minority-owned company providing clean energy brokerage services to corporate and institutional clients. Medill works with large energy consumers to address long-term requirements and support sustainability goals by providing customized solutions through its network of world-class project developers.

 **Good Steward Consulting** (GSC) (goodstewardconsulting.com) specializes in rural communication for utility-scale renewable energy developments. GSC is dedicated to the future of small town America and agriculture, and is passionate about renewable energy and the environmental and economic benefits these projects provide.
